

# COVID TESTING Through SAFE

Our team of experts is ready to help you develop a testing strategy that protects your workforce against COVID-19. Our three-step process makes it easy to get up and running quickly:

We **Assess** your organization's testing needs by evaluating factors such as industry, risk profile, and geographic location to develop a comprehensive testing strategy.

We **Connect** you to our testing network and provide a seamless testing experience for your employees - scheduling appointments, payment vouchers, and consent forms are all handled through our mobile-friendly site.

You **Protect** your employees with access to reliable tests, quick results, and quarantine procedures for isolating employees who test positive.

Our team of experts re-evaluates your testing strategy as new information and test options become available to ensure the best plan for your business is always in place.
